TECHNOLOGISTS

PROJECT MANAGERS

We are looking for extraordinary talent to join the **Yellow Hats League**, a diverse community of world-class experts who build and spread innovative models of education.

DESIGN THINKING FACILITATORS

LEARNING SCIENTISTS

STAFF DEVELOPERS

What's the purpose of the Yellow Hats League?

We envision a future where radically new kinds of learning environments are created and spread, to enable all young people to thrive in—and transform—the 21st century. While we do not promote just one single model of “school,” we are guided by a belief that there are at least [eight great leaps](#) required to shift the existing educational model.

Many educators, students, and families dream of building innovative learning environments, but the research and development (R&D) needed to create breakthrough models requires significant capacity. **We created the Yellow Hats League to build a talent force for the education field that is passionate about and capable of joining efforts to transform the way we design school.** We've called it the Yellow Hats League because, in short, **we are builders**, and together, we are building beyond the current [limits](#) of school design!

BENEFITS

Yellow Hats have opportunities to:

BUILD KNOWLEDGE

Access curated resources, share and borrow ideas from others

BUILD RELATIONSHIPS

Connect and collaborate with other experts who are fired up about school model innovation

BUILD MODELS

Advise or work on projects to build and spread innovative models (with expedited application process)

REQUIREMENTS

Yellow Hats bring a remarkable diversity to the challenge of reimagining education, but we are united by a few things:

- ▶ We believe that all children deserve an amazing education: one that nurtures their greatest potential and empowers them to thrive in—and transform—the 21st century
- ▶ We are passionate about building new models of learning and believe that the [8 Great Leaps](#) are a good starting point
- ▶ We believe innovation should be done in rigorous, research-informed ways and in deep partnership with students and families
- ▶ We feel aligned with Transcend's [core values](#): diverse voices, perpetual beta, long-term, results for kids, love, and play big!
- ▶ We have strong relationship building, planning, and execution skills. Learn more about these competencies [here](#)
- ▶ We have expertise in at least one of the areas needed for Transcend's R&D projects

Visit the [Frequently Asked Questions](#) page—we update it on a weekly basis!
